ACME RACK is a live production powerhouse built for in-place studio environments or mobile on-the-go production rigs. With 4x 3G HD-SDI inputs (powered by award-winning AJA technology) and 1x 4K HDMI (ideal for region of interest pulls), professional live production is in reach of everyone. It is compatible with Telestream Wirecast, vMix HD, vMix Pro and LiveStudio - our new software - to provide producers with the ideal environment based on their needs.

Designed for maximum space efficiency, the ACME RACK is built into an ultra-short depth 2U rackmount configuration. At just over 16" deep, you won't need a huge transport rack case to house a unit for your OB truck or vehicle.

Compatible with
Telestream Wirecast
vMix HD & vMix Pro
LiveStudio
